Global Roaming Quality

ISO9001
CERTIFIED

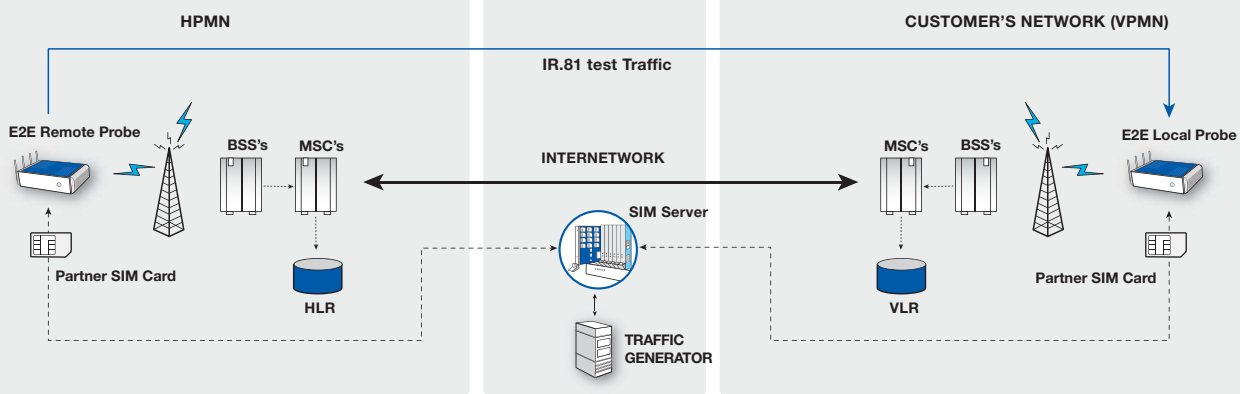

Open Connectivity
Certified Provider

GLOBAL ROAMING QUALITY

Global Roaming Quality

As a founding member of GRQ work group, ADECEF has participated in the drafting of the IR.81 standard since its origins, and was the first GRQ vendor to be officially certified by GSMA.

GRQ is the most recent and important initiative of GSMA to regulate the quality of service agreed upon between roaming partners. It's in depth knowledge of this new standard and the extensive coverage of its RoamFix platform, with presence in more than 50 countries, allows ADECEF to offer complete, reliable, high quality roaming services, either under opex or capex business models.
