Certified Provider

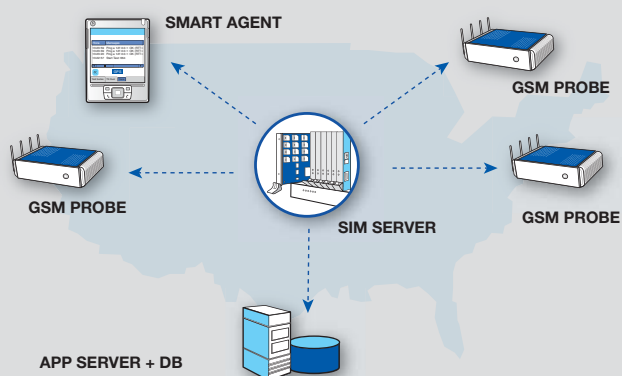

GLOBAL ROAMING QUALITY

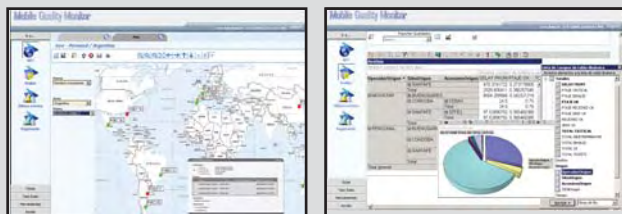

VAS Quality Monitoring

RoamFix solution allows for a proactive application of value-added services (VAS) quality monitoring policies within the domestic network.

- Flexible E2E traffic configuration, execution and validation from different locations, carriers and networks.
- SIM central storage and distribution through IP networks to remote probes.
- Full test of SMS, MMS, GPRS, WAP 1.0 & 2.0. Support of segmentation and reassembly. Logging of all relevant timestamps.
- Voice Quality with objective MOS calculation according to ITU-PESQ 8.6.
- Full Data testing at Link level (LCP), Network level (IPCP/ICMP), Transport level (TCP/UDP) and Service level (FTP, HTTP, Telnet, SMTP, DNS, WAP, SIP, RTSP, RTP, RTCP).
- 3G support: HSDPA 3.6 & 7.2, HSUPA 2.0 & 5.8.
- Video Quality with objective MOS calculation according to ITU-PEVQ. Advanced Video Streaming analysis and playback.
- Blackberry and Symbian OS support.
